

# Junk Yard Cars

---

By Jerry Hoverson, MMR

# Junk Yard Cars

---

Start by getting a roll of  
"HEAVY DUTY" Aluminum foil

# Junk Yard Cars

---

About  
3"x3"  
for HO

Cut several squares large enough  
To cover the size of the vehicle

# Junk Yard Cars

---

Pick out the vehicle you plan on using

# Junk Yard Cars

---

Start forming the foil over the vehicle

# Junk Yard Cars

---

Continue to form it using just your fingers

# Junk Yard Cars

---

I used the  
end of a  
small paint  
brush here

Then use a small blunt object  
To fine tune the foil shape

# Junk Yard Cars

---

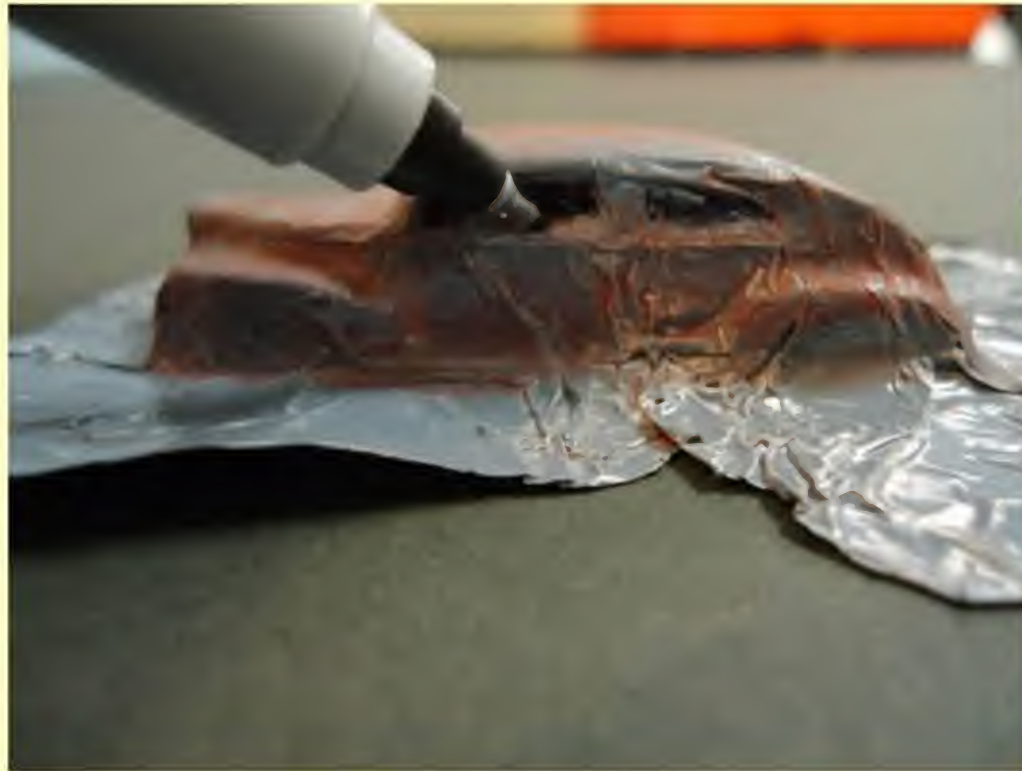

Now spray paint the vehicle  
with the desired color

# Junk Yard Cars

---

You could  
also paint  
the  
bumpers  
with a  
silver

Blacken in the windows with a  
sharpie or some paint

# Junk Yard Cars

---

Now it's time to rust it up.  
I start with "Rust-n-Dust"

# Junk Yard Cars

---

Then I'll put on a layer of  
**BROWN** chalk

# Junk Yard Cars

Just dip your dry application brush into the chalk...

Apply the chalk

Cover the entire vehicle

Rub it in with the brush

# Junk Yard Cars

---

Now repeat the process using  
a BLACK chalk....

# Junk Yard Cars

---

But don't do the **BLACK** as  
heavy as you did the **BROWN**

# Junk Yard Cars

---

When your satisfied lock in the chalk  
with a spray of Testers Dull Cote

# Junk Yard Cars

---

When dry, turn the car over and carefully pull the foil away from the car and ....

# Junk Yard Cars

---

remove the vehicle

# Junk Yard Cars

---

Now trim away the excess foil

# Junk Yard Cars

---

Cut a couple of slits in the wheel wells  
and fold the flaps back

# Junk Yard Cars

---

Your wreck is now ready for the layout

# Junk Yard Cars

---
